

How to Submit your Virtual Performances

The Suzuki Association is producing two Online Virtual Performances for broadcasting via Zoom at the **Annual Twinkle Graduation for Violin and Cello students on Sunday 21 November 2021**. These performances will feature students who have submitted a video recording of their piece.

The backing track has been provided for the student to play along with while using headphones so that only the student's performance is recorded in the uploaded video. The Suzuki editor will assemble the submitted videos in a grid pattern. Please read the accompanying filming instructions carefully to ensure your submission can be included.

When exporting your video from your device, please ensure it is a **high-resolution file** (minimum 1080 x 1920). If you can attach it to an email, it is too small. It should be at least hundreds of megabytes in size.

Please upload the file using the link below. This allows you to upload directly to the **Suzuki Google drive** folder from your smartphone, tablet, or computer. If you are concerned about using too much of your mobile data allocation, you can copy the high-resolution file from your phone to a computer via a USB cable and then upload from the computer.

Click on the performance link below to submit your video.

By submitting a recording of yourself or your child/ren, you are granting STEAA(NSW) Ltd Permission to publish this performance online during the Twinkle graduation event.

We hope that this will be an enjoyable experience for all.

The process of practicing, preparing, and recording a video at home is as important as all the preparation for a live performance. Apart from providing good experience for the process of live performing, it also provides a wonderful opportunity to gather friends and family together to watch and celebrate the final result. We hope that you and your child enjoy the time spent together creating something memorable for all our youngest students.

Regards,

The Suzuki Admin Team
